Background discussion is available [here](#) and [here](#). Compatible implementations will be required to pass the TCK. This ballot applies to all MicroProfile specifications.

RESOLVED, the Steering Committee confirms that the MicroProfile working group will operate without a MicroProfile compatibility program and will not develop and utilize a Compatibility logo for use by compatible implementations of MicroProfile, and instead will allow any implementation that can make bonafide claims of compatibility in accordance with the Eclipse Foundation Specification Process to be listed and linked to as a compatible implementation on its webpage.
